THE PERFECT PARTNER FOR BUSINESSES

PIPS
PRICE AND INDEX PAGES

USE SEIFSA PIPS TO:

1. Support long-term contracts
2. Account for your contract contract price adjustment
3. Improve organisational sustainability
4. Minimising project cost overruns

SEIFSA PIPS is any institution's best insurance against price volatility eroding profit margins and sustainability, irrespective of whether the entity is a client, supplier or service provider. It is important to safeguard against project cost overruns by periodically reviewing and adjusting your contracts by using the SEIFSA PIPS.

Can you afford to let price fluctuations risk your profit margin and the long-term sustainability of your organisation?

- Preferential pricing for multi-user licensing

DEBIT ORDER FACILITY AVAILABLE

How Companies benefit from using SEIFSA PIPS

- By using SEIFSA PIPS, a buyer / client in a contract can be certain that market-related increases are paid out to suppliers (as determined by a Contract Price Adjustment clause), ensuring the sustainability and improvement of organisation profitability.
- Suppliers / contractors can protect their profit margins from their existing or new contracts by using the SEIFSA PIPS.
- Municipalities, SOEs, government departments and mining companies in South Africa have done exactly that – i.e. make use of SEIFSA PIPS as the preferred tool in their Contract Price Adjustments.
